

FortiGate Infrastructure

In this two-day course, you will learn how to use advanced FortiGate networking and security.

Topics include features commonly applied in complex or larger enterprise or MSSP networks, such as advanced routing, transparent mode, redundant infrastructure, site-to-site IPsec VPN, single sign-on (SSO), web proxy, and diagnostics.

Product Version

FortiOS 6.4

Formats

- Instructor-led classroom
- Instructor-led online
- Self-paced online

Agenda

1. Routing
2. Software-Defined WAN (SD-WAN)
3. Virtual Domains
4. Layer 2 Switching
5. IPsec VPN
6. Fortinet Single Sign-On (FSSO)
7. High Availability (HA)

8. Web Proxy
9. Diagnostics

Objectives

After completing this course, you should be able to:

- Analyze a FortiGate route table
- Route packets using policy-based and static routes for multipath and load -balanced deployments
- Configure SD-WAN to load balance traffic between multiple WAN links effectively
- Inspect traffic transparently, forwarding as a Layer 2 device
- Divide FortiGate into two or more virtual devices, each operating as an independent FortiGate, by configuring virtual domains (VDOMs)
- Establish an IPsec VPN tunnel between two FortiGate devices
- Implement a meshed or partially redundant VPN
- Diagnose failed IKE exchanges
- Offer Fortinet Single Sign-On (FSSO) access to network services, integrated with Microsoft Active Directory (AD)
- Deploy FortiGate devices as an HA cluster for fault tolerance and high performance
- Deploy implicit and explicit proxy with firewall policies,

- authentication, and caching
- Diagnose and correct common problems

Who Should Attend

Networking and security professionals involved in the design, implementation, and administration of a network infrastructure using FortiGate appliances should attend this course.

This course assumes knowledge of basic FortiGate fundamentals. Participants should have a thorough understanding of all the topics covered in the *FortiGate Security* course before attending the *FortiGate Infrastructure* course.

Prerequisites

- Knowledge of OSI layers
- Knowledge of firewall concepts in an IPv4 network
- Knowledge of the fundamentals of FortiGate, as presented in the *FortiGate Security* course

System Requirements

If you take the online format of this class, you must use a computer that has the following:

- A high-speed Internet connection
- An up-to-date web browser
- A PDF viewer
- Speakers or headphones
- One of the following:
 - HTML5 support
 - An up-to-date Java Runtime Environment (JRE) with Java Plugin enabled in your web browser

You should use a wired Ethernet connection, *not* a Wi-Fi connection. Firewalls, including Windows Firewall or FortiClient, must allow connections to the online labs.

Certification

This course and the *FortiGate Security* course are intended to help you prepare for the NSE 4 certification exam.
