In this two-day class, you will learn the fundamentals of using FortiManager for centralized network administration of many FortiGate devices.

In interactive labs, you will explore deployment strategies, which include single or multiple ADOMs, device registration, policy packages, shared objects, installing configuration changes, provisioning FortiManager as a local FortiGuard distribution server, and troubleshooting the features that are critical to day-to-day use after you deploy FortiManager.

**Product Version**
FortiManager 6.2

**Formats**
- Instructor-led
- Instructor-led online
- Self-paced online

**Agenda**
1. Introduction and Initial Configuration
2. Administration and Management
3. Device Registration
4. Device-Level Configuration and Installation
5. Policy and Objects
6. SD-WAN and Security Fabric
7. Diagnostics and Troubleshooting
8. Additional Configuration

**Objectives**
After completing this course, you will be able to:
- Describe the key features and capabilities of FortiManager
- Deploy administrative domains (ADOMs) to support multiple customers on a single FortiManager
- Restrict concurrent ADOM access by using workspaces and workflow mode
- Use provisioning templates for device-level changes across many devices
- Identify the synchronization states and manage the revision history of managed devices
- Manage firewall policies across multiple FortiGate devices using policy packages with shared and dynamic objects
- Deploy policies and objects from the global ADOM to multiple ADOMs
- Understand Security Fabric integration with FortiManager
- Deploy SD-WAN using central management
Describe high-availability (HA), backup, and recovery options for FortiManager
Manage the firmware of supported devices centrally
Offer a local FortiGuard distribution server to your Fortinet devices
Diagnose and troubleshoot import and installation issues

Who Should Attend
Anyone who is responsible for the day-to-day management of FortiGate security policies using the FortiManager platform.

Prerequisites
- Knowledge of firewall concepts in an IPv4 network
- Familiarity with all topics in *FortiGate Security* and *FortiGate Infrastructure*
- Basic understanding of network management systems

System Requirements
If you take an online format of this class, you must have a computer that has the following:
- A high-speed Internet connection
- An up-to-date web browser
- A PDF viewer
- Speakers / headphones
- One of the following:
  - HTML5 support
  - An up-to-date Java Runtime Environment (JRE) with Java plugin enabled in your web browser
You should use a wired Ethernet connection, *not* a WiFi connection. Firewalls, including Windows Firewall or FortiClient, must allow connections to the online labs.

Certification
This course is part of the preparation for the NSE 5 certification exam.
