

NSE 8 Immersion

In this two-day self-paced lab environment, you will be challenged to configure a variety of Fortinet products based on a set of objectives.

On the first day, you will receive instructions and learning tools to help you work with the lab environment, before you start your challenge. Throughout the two days, a trainer will be available to support you while you complete the tasks.

Product Version

- FortiGate 6.0.6
- FortiManager 6.0.6
- FortiAnalyzer 6.0.6
- FortiADC 5.2.8
- FortiAuthenticator 6.0.2
- FortiMail 6.0.4
- FortiSandbox 3.0.5
- FortiWeb 6.1.0

Formats

- Instructor-led classroom
- Instructor-led online

Agenda

1. FortiGate—Networking
2. FortiGate—Operations
3. FortiGate—VPN
4. FortiGate—Policies
5. FortiGate—Authentication
6. Fortinet—Management
7. Fortinet—Advanced Technologies

Objectives

After completing this course, you will have a better understanding of the level and complexity of the tasks and topology that are involved with the NSE 8 practical exam. This will help you to prepare for the NSE 8 practical exam, where you will be faced with a different set of tasks and a new topology of the same complexity level.

Who Should Attend

Networking and security professionals in pursuit of NSE 8 certification.

Prerequisites

Students must pass the current NSE 8 written exam before attempting this course.

System Requirements

If you take the online format of this class, you must use a computer that has the following:

- A high-speed internet connection
- An up-to-date web browser
- Speakers or headphones

Highly recommended:

- Minimum resolution of 1920x1024 on the primary screen
- Second screen for lab tools

To connect to the remote labs, you require one of the following:

- Web browser with HTML 5 support
- FortiClient for SSLVPN and RDP client of choice

Certification

Taking this course will help you assess your current level of knowledge, as well as your time-management skills, as you prepare to take the NSE 8 practical exam.
