

NSE 5 Network Security Analyst—FortiAnalyzer

NSE 5 Certification

The Network Security Analyst designation recognizes your ability to implement network security management and analytics using Fortinet security devices. We recommend this course for network and security analysts who require the expertise to centrally manage, analyze, and report on Fortinet security devices. Visit the [Fortinet NSE Certification Program](#) page for information about certification requirements.

Fortinet NSE 5—FortiAnalyzer 6.4

The **Fortinet NSE 5—FortiAnalyzer 6.4** exam is part of the NSE 5 Network Security Analyst program, and recognizes the successful candidate's knowledge of and expertise with FortiAnalyzer.

The exam tests applied knowledge of FortiAnalyzer configuration, operation, and day-to-day administration, and includes operational scenarios, system configuration, device registration, and troubleshooting.

Audience

The **Fortinet NSE 5—FortiAnalyzer 6.4** exam is intended for network and security analysts who are responsible for the configuration and administration of FortiAnalyzer solutions for centralized logging and reporting.

Exam Sample Questions

A set of sample questions is available from the NSE Training Institute. These questions sample the exam content in question type and content scope. However, the questions do not necessarily represent all the exam content, nor are they intended to assess an individual's readiness to take the certification exam.

See the [NSE Training Institute](#) for the course that includes the sample questions.

Examination Policies and Procedures

The NSE Training Institute recommends that candidates review exam policies and procedures before registering for the exam. Access important information on the [Program Policies](#) page, and find answers to common questions on the [FAQ](#) page.
